### **What you need to ID sheet – Articulated Pelvis Models**

This sheet tells you what you need to be able to identify on this model – check the “to know” sheet for anything else you may need to know about this topic.

You are **done** with this model when you can identify **all** of the following structures:

- Know the differences between the male and female pelvis (see lab manual) and be able to recognize if a pelvis is male or female.
- Identify the following structures:
  - pubic symphysis
  - sacroiliac (= iliosacral) joint
  - L/R coxal bones
  - ilium portion of coxal bone
  - intervertebral disc
  - ischium portion of coxal bone
  - pubis portion of coxal bone
  - acetabulum
  - obturator foramen
  - iliac crest
  - ischial tuberosity
  - ischial spine
