Class	Topic	Date

Take notes like you usually would in math class.

- Formulas
- Equations
- Sample Problems

$$4X + 6 = -10$$
$$4X = -10 + -6$$
$$4X = -16$$
$$X = -16/4$$
$$X = -4$$

Write out the step-by-step process for solving the problem.

Make connections with arrows.

Step 1:

Step 2:

Step 3:

Answer: X = -4

Write a brief one sentence statement on what you can find on this page of notes. Identify the specific steps that you have problems with (ex. Step 3 is hard). Write down questions you have for your professor or a tutor. Ask them during class, office hours, or a tutoring session.
