43222600 Network service equipment
43223300 Datacom and network connectivity installation devices and equipment
Tallahassee Community College (hereinafter referred to as "TCC" or "The College") is requesting qualified vendors (hereinafter referred to as "Respondent", "Respondents", "Vendor", or "Vendors") to submit responses to this Request for Information for Wireless Infrastructure Modernization Project (hereinafter referred to as "RFI").

The College has determined that its present wireless infrastructure is no longer meeting the needs of the College and has not met the needs of the College for quite some time. The College is looking to upgrade and/or replace its aging wireless infrastructure at all eight campus locations as part of a multi-year project. The new wireless infrastructure must support all of TCC's students and employees (currently 12,800 students and 1,600 faculty) and guests. Our expectation is that each wireless user will have on average three devices, and the proposed solution must provide a minimum of 5Mbps bandwidth for each of those members. The project encompasses eight campus locations and includes 256 classrooms, 244 labs and 1,326 offices. Additionally, the proposed solution must meet the bandwidth and authentication needs of other network devices including phone handsets, door locks, streaming devices, AV equipment, projectors and Internet of Thing (IoT) devices, etc. The solution must provide an easy to use, robust, and secure solution for the provisioning and configuration of the network.

Request for Information will be opened at the below address at 02:00 P.M., May 31, 2019.
